## S2S Systems Source Code License

Extend S2S Systems source code to meet your needs with full access to our application suite and base architecture.

Don't mistake S2S System's fully integrated, real-time enabled development environment with other industry toolkits. We provide integrated visualization, database, model and user interface capabilities, you provide the technology.

S2S Systems provides development partners with the ability to rapidly insert their technologies into the S2S framework utilizing S2S's unique plug-in architecture. New plug-ins utilize a rich set of graphical and functional components and seamlessly integrate with the existing database and data model.

- ✦ Start With a Fully Operational Application
- ✦ Modify the Source to Meet Your Needs
- ✦ License Internally or Commercially
- ✦ Maintain Proprietary Technology

The bottom line is that S2S development partners spend their limited software development budgets on their technology while we spend ours on infrastructure.

- ✦ Integrated Database
- ✦ Consistent Model
- ✦ PlugIn Architecture
- ✦ Graphics & User Interface
- ✦ Online Licensing
- ✦ Automated Deployment
